

### ***User Test Script:***

This is an app focused on helping users such as young teenage students or people who are looking for higher academic schools such as Graduate and PhD programs but don't know where to start or what to do. This platform also helps people get customized matches of what type of major they might be interested in, especially for those who are in high school and don't know who to become. Dalphin also offers a mentor and mentee connection via the app by connecting prospect students with their parents or mentors to track progress or help each other out to find the right match at the end.

For this user testing I would like you to achieve 3 paths to learn about how this app works:

1. Try to explore searching for majors as a prospect student and open up your suggested school profile
2. Try to explore searching for schools as a parent for graduate student and reach all the way up to the Track Mentee page.
3. Try to connect mentees and mentors to one another and find a pop up information page about IELTS, TOEFL, GRE, GMAT.

Please talk through each step you take and what it makes you feel or think about.
