

5) How were you influenced to pick a career path through school?

4 responses

- I already decided before applying
- I always loved literature and language and that was always my favorite subject, so I knew I had to do something related to that.
- I was part of a T9 Hackathon in my undergrad, and was in charge of making wireframes for how the app looked for our group project. Afterwards, my friend told me I should look into UI design, and I didn't know that there was a label for what I liked to do (organizing the layout, making it easy to navigate, etc.), so after 3 years, I decided to go for it.
- I feel like we weren't prepared enough for this choice and it hasn't been discussed much

6) Did you travel and relocate for university/graduate school?

4 responses

7) Did your parents help you with the admission application process?

4 responses

- No- I am an adult
