9) Which sources did you use to get help with any questions that came up during the process?

4 responses

None

My parents helped me a lot and my teachers at school were very helpful.

I don't consider the financial aspect part of the application, since you pay for the semester after it starts, but I did ask my parents about loans for more information.

Honestly, just asked my siblings who have been through the process or students I knew in pervious batches.
