

User Test Results:

Summary of feedback from 2 User Testers:

- Why next instead of yes on first 3 questions of the app?
- Prospect student should be up and parent down to match the test objectives
- Sign in layout is very unique, might be confusing for first time users
- "I don't like clicking the small spaces, such a circles on the prospect student vs parent options. Instead I would like to tap on the icon and select the options"
- "Pick as many a you like" message is a little hidden, I have missed looking at it at first"
- For the questions of the quiz part of the app, the language could be improved to maybe which one is more important?
- Using "Meh" as an option could be updated into something more clear.
- "Instead of circle button, you could type up "See Matches" to let users know what to expect."
- For missing the deadlines, I would like to be informed that I am about to miss a deadline, instead of getting notified afterwards.
- Footer navigation needs a bigger tap space, meaning the text also should be clickable for bigger fingers.
- Connect icon on the footer could be more informative, it seems a little vague.
- Adding official links to the resources should be super helpful
- For invitation of the users with check marks next to them makes sense, however, having an x to the users seems like t=something went wrong. To indicate that the connection hasn't been complete yet, you should use another icon.
